Actual filtration performance, i.e. efficiency and dust holding capacity, will vary depending upon filter design parameters and the normal variation of the media properties consist with the specification range. We continuously strive to define our products and hence the specifications are subject to change.

实际过滤性能，如效率、容尘量会根据过滤器设计参数的变化，以及滤材在技术参数范围内的正常波动而改变。本公司一直在努力定义我们的产品，因此保留技术参数改变的可能。
